

From LHC To The Universe

Time: 15 - 18, December, 2008

**Place: Physics Department
National Taiwan University
Taipei, Taiwan**

This workshop is organized by the Physics Departments at National Taiwan University (NTU) and University of California at Davis (UCDAVIS). The aim of the workshop is to bring together interested people to study issues in particle physics, astrophysics and cosmology in the era of LHC. Topics to be discussed include:

Collider Physics at LHC :

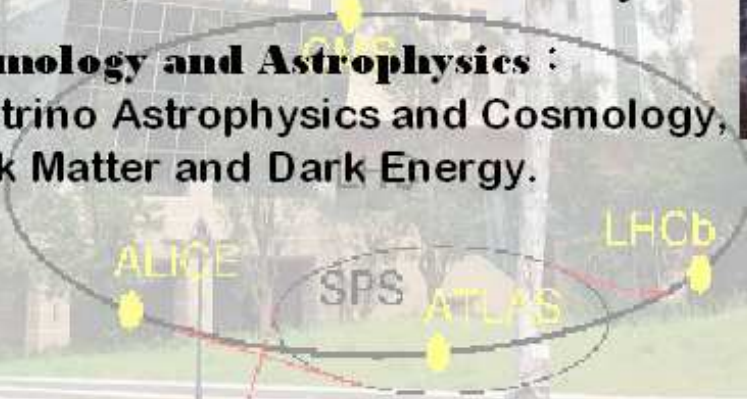

Physics in the Standard Model, and Beyond.

Flavor Physics :

B and CP, Neutrinos and New Physics.

Cosmology and Astrophysics :

Neutrino Astrophysics and Cosmology,
Dark Matter and Dark Energy.

Sponsored by:

Physics Departments of NTU and UCDAVIS
NTU Center for Theoretical Physics
Excellent Research Projects at NTU
National Center for Theoretical Sciences
